Abstract

This is a sample research paper demonstrating the publishing platform capabilities. Mire allows students to publish their research findings easily through a simple Markdown-based workflow.

Introduction to Mire

Mire is a platform designed to facilitate the sharing of student research. By leveraging modern web technologies and static site generation, we provide a fast, secure, and accessible way to publish academic work.

How It Works

The platform uses a Git-based workflow:

1. **Write:** Authors write their research in Markdown format.
2. **Submit:** Changes are submitted via Pull Requests on GitHub.
3. **Review:** Peers or administrators review the submission.
4. **Publish:** Once merged, the site automatically rebuilds and deploys.

Features

- **Bilingual Support:** Interface available in English and Chinese.
- **PDF Generation:** Automatic conversion of articles to PDF for easy downloading.
- **Responsive Design:** optimized for reading on any device.

Getting Started

To submit your own research, please refer to the README.md file in the repository root. We look forward to seeing your contributions!

Example Equation

$$E = mc^2$$

Example Code

```
def hello_research():  
    print("Hello, World of Science!")
```
